

## Optos *Advance* TM Measuring Cup to Disc Ratio

#### **Contents**

Purpose
Measuring Cup to Disc
Deleting Annotations

#### **Purpose**

The purpose of this document Is to provide guidance on how to measure the Cup to Disc Ratio in Optos Advance.

### Measuring Cup to Disc

- 1 Open the desired Patient Study.
- 2 | Zoom in on the optic nerve by clicking and holding your left mouse button and dragging away from you.

- 3 Click the drop-down arrow beside **Annotations** to select a tool.
- 4 | Select the **Ratio** tool beneath the Linear Measurements header. Two ratios will be shown:
  - From the shorter line to the longer line.
  - From the longer line to the shorter line.
- 5 | Click and hold the left mouse button from the top of the disc and drag the line to the bottom of the disc and release.
- 6 Click and hold the left mouse button at the top of the cup and drag the line to the bottom of the cup and release.

# Optos *Advance* TM Measuring Cup to Disc Ratio

7 | The ratio will be calculated once both lines are drawn. You may draw your lines horizontally, vertically, or diagonally.

- 8 | Lines may be adjusted by clicking and dragging the  $\square$  at their ends.
- 9 | Your annotation will be saved on your image. **Note:** A draft presentation is automatically saved when you add annotations and measurements to an image.

## **Deleting Annotations**

1 | To delete an annotation, right click on an annotation square and select **Delete**.
